

North American Architectural Woodwork Standards Committee New Materials, Products, Technology Review and Adoption Form

To facilitate the adoption, use and ongoing relevance and enhancement of its standards publications and derivative works, the Sponsor Associations - the Architectural Woodwork Manufacturers Association of Canada (AWMAC) and the Woodwork Institute, in conjunction with the North American Architectural Woodwork Standards Committee (Committee), encourage third-party requests for new materials, products and/or technology development for inclusion in future NAAWS editions.

After fully executing and submitting to the NAAWS Committee Secretary, the below form, the NAAWS Committee will review, consider and if approved, grant third-party requests for new materials, products and/or technology development for inclusion in future NAAWS editions.

Requests will be placed on the Committee's next meeting agenda and acted on during its normal course of business, as time permits. Decisions of the Committee will be provided in writing by the Committee Secretary. If a decision is not reached at the first meeting wherein the item was added to the agenda (or subsequent meetings) the Secretary shall inform the requesting party of the status of the process.

If permission is granted, I/We acknowledge and agree:

- That if the NAAWS Committee agrees to add the new material, product and/or technology it will not be effective until the next edition of the NAAWS Committee publication and/or derivative work.
- To include a release of copyright and/or patent as may be applicable.
